

JUNE 19-23

CREEPING, CRAWLING, CRITTERS, Ages 4 - 7

Get your bug catcher and net ready! We are going on a hunt into the fascinating world of bugs! For one week, we will keep our new pets in habitats we have created ourselves and seek to provide them with their favorite foods. At the end of the week, we will send our new friends back to their natural habitats.

GOING BUGGY, Ages 8 - 11

This is a brand new camp for young entomologists ages 8 - 11. This camp is designed to take off where Creeping, Crawling, Critters left off. Campers will go deeper in the study of insects and spiders, and whatever other critters may slither by. Campers will hunt, capture, experiment, create bug habitats, observe, study, make a photo journal and do experiments with live bugs.

JUNE 26-30

MASTER ARTIST, Ages 4 - 11

Campers will be up to their necks in paint, clay, and all kinds of artistic media as they are transformed for one week into master artists. Be sure to bring your imagination and wear clothes that can get dirty.

JULY 3 - 7

**MERRY MELODIES &
SUPER VIBRATIONS, Ages 4 - 11**

This camp is all about making music, and learning about the science involved in making music. Campers will sing, dance, hop, and play instruments, and do some musical experiments. Come join in the fun as we mix science and music in this exciting camp. (This camp will only cost \$140.00 because there will be no camp on July 4th.)
